

ImageVue & ImageJetVue

When your image is everything

CLEAR FOCUS

POP Applications [outside view]

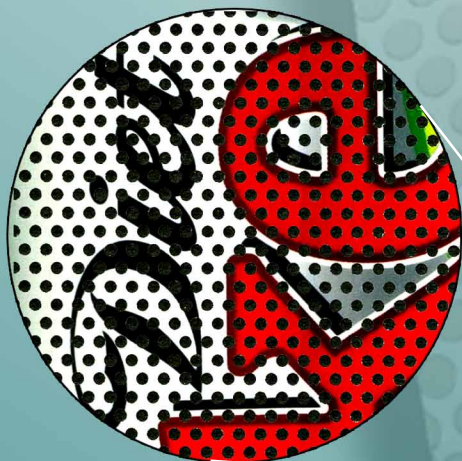

[inside view]

By popular demand, **CLEAR FOCUS Imaging** is pleased to introduce ImageVue™ and ImageJetVue™, two new One Way Vision perforated window-graphics films. These high-performance, exterior-mount vinyl films deliver outstanding image quality on a wide variety of printers. ImageVue and ImageJetVue are the perfect choice when image quality is of primary importance, yet you also want to keep the view out.

From the Leading Producer of One Way Vision™ Films

ImageVue and ImageJetVue feature a 65/35 perforation pattern, meaning 65% of the film is retained and 35% is removed. This configuration offers more print surface area for enhanced image resolution and color reproduction while retaining the films' one-way visibility. With their larger surface area combined with their smaller hole size, ImageVue and ImageJetVue open up a new segment of the window-signage market. These new films are ideally suited for printing decals, POP graphics and other small-format retail signage requiring finer detail.

ImageVue is compatible with solvent-based inkjet printing, screen printing, electrostatic transfer, thermal transfer and airbrushing. ImageJetVue is designed for use with inkjet printers using aqueous pigmented and dye-based inks.

Applications

- Decals & other small-format window signage
- POP posters
- Retail & commercial signage
- Other window graphics where image quality has priority over the view

Comparison of CLEAR FOCUS One Way Vision Films

ImageVue &
ImageJetVue
(1.5-mm holes,
65/35 perforation
pattern)

ClassicVue
(1.5-mm holes,
50/50 perforation
pattern)

SuperVue &
JetVue
(2-mm holes,
50/50 perforation
pattern)

Product Features

- 8-mil perforated, pressure-sensitive vinyl (black/white composite film)
- More print surface area + small hole size = enhanced image resolution & color reproduction
- Compatible with solvent inkjet printing, screen printing, electrostatic transfer, thermal transfer & airbrushing (ImageVue)
- Compatible with aqueous pigmented and dye-based inkjet printing (ImageJetVue)
- Easy to install and remove

Note: Not for use on vehicle windows because of reduced visibility.

Product Name	Item No.	Size	Thickness	Core Size	Adhesive	Vinyl Type
ImageVue	CFEABWIV54X100	54" x 100'	8 mil	3"	Permanent Clear Acrylic	Calendared PVC
ImageJetVue	CFIJV54X50	54" x 50'	8 mil	2"	Permanent Clear Acrylic	Calendared PVC

Application Tip: Prior to application, make sure that the glass surface where the graphic will be mounted is clean and dry. Do not use solvent-based window cleaners to prepare the glass as solvents can adversely affect the film's adhesion. For more information, visit www.clearfocus.com/install.html.
